Summary

Bringing nearly a decade of experience in the IT sector, I specialize in full-stack mobile and web development. My career is defined by a commitment to delivering high-quality solutions throughout the development lifecycle. With expertise spanning front-end and back-end technologies, I excel in developing robust applications tailored to client needs. My collaborative nature and proactive approach ensure successful project outcomes, while my dedication to ongoing learning keeps me at the forefront of industry trends and best practices. I am poised to leverage my skills and experience to drive innovation and exceed expectations in any professional setting.

Experience

Software Engineer

Xendit
01/2022 - 03/2024

- Directly communicate with managers to understand project requirements and objectives.
- Develop comprehensive technical plans outlining project scope, timelines, and resource allocation.
- Conduct spike analyses to explore potential technical solutions and mitigate risks.
- Create detailed technical specifications outlining system architecture, design patterns, and implementation strategies.
- Foster cross-team collaboration to align on project goals, resolve dependencies, and optimize resource utilization.
- Integrate channels seamlessly to ensure cohesive communication and data flow across platforms.
- Lead development efforts using best practices and coding standards to deliver high-quality software solutions.
- Oversee deployment processes, ensuring smooth transitions from development to production environments.
- Execute rigorous testing procedures to validate software functionality, performance, and security.
- Proactively identify and address bugs and technical issues to maintain product integrity and user satisfaction.
- Handle issues efficiently by implementing effective troubleshooting strategies and collaborating with relevant stakeholders for timely resolution.

Software Engineer

Offshore Team
08/2020 - 11/2021

- Responsible for developing android and ios apps using React Native.
- Write well designed, testable, efficient code.
- Modified existing software to correct errors, upgrade interfaces and improve performance
- Collaborate closely with the team and other team members to plan, design and develop robust solutions.
- Formulated processes based on the requirements set by the clients.
- Implemented designs, including experimentation and multiple iterations.
- Research, design and implement scalable applications
  Design and implement database in accordance to end users information needs and views.
- Interface with business analyst, developers, and technical support to determine optimal specifications.
- Participate in daily scrum and other technical meetings.
- Presentation/demo the functionality of the system/component to the clients. · Continuously discover, evaluate, and implement new technologies to maximize development

Software Engineer

Twist Resources
08/2018 - 08/2020

- Developed Android and iOS applications using React Native technology

- Assumed a leadership role as a Team Lead for React Native projects
- Directed and coordinated the efforts of a team in React Native app development
- Ensured successful execution and delivery of React Native projects through effective leadership and coordination

Software Engineer

Accenture

06/2017 - 08/2018

- Responsible for developing back end and front end for Rules Engine.
- Interface with business analyst, developers, and technical support to determine optimal specifications.
- Participate in daily scrum and other technical meetings.
- Presentation/demo the functionality of the system/component to the clients.
- Collaborate closely with the team and other team members to plan, design and develop robust solutions.
- Contribute in all phases of the development lifecycle
- Continuously attend training.

Software Engineer

Twist Resources

06/2014 - 03/2017

- Responsible for developing Android applications using native language.
- Responsible for developing Web components (Widget).
- Developed Rest API for back-end server application using Node.js.
- Developed user interfaces using React and React Native.

Skills

Node.js, React.js, Express.js, MongoDB, JavaScript, Amazon Web Services (AWS), NextJS, Redis, React Native, Docker, Kubernetes, Test Automation, Unit Testing

---

Education

BSIT

AMA Computer College • San Fernando, Pampanga

03/2014

Graduated magna cum laude
